ABSTRACTED-PUB-NO: JP 51043330A

BASIC-ABSTRACT:

The metal plate is coated on the surface with a treating agent and dried, treating agent including mainly an alkaline soln. or dispersion-liquid of copolymer of ethylene 70-95 mol % and alpha, beta-olefin unsatd. carboxylic acid 30-5 mol % in the form of salt in which 20-100 mol % of the carboxyl gp. content is neutralized with ammonia or volatilizable amines, and alpha, beta-olefin unsatd. carboxylic acid 30-5 mol % in obtained by added compds. with vinyl gp. Used as a paint primer, the coating enhances rust prevention, lubrication and paint application.
